Subject: Sacramento City Council approves water, sewer rate increases - Sacramento City News - The Sacramento Bee

<http://www.sacbee.com/2012/03/27/4371667/proposed-water-sewer-rate-hikes.html>

"Sacramento... three years of double-digit rate hikes that will raise the average household's monthly tab from \$49 to \$68 by 2014."

As an EID ratepayer, don't you envy Sacramento water and sewer customers?

The average EID water and sewer ratepayer will pay \$135 monthly in 2014*... twice as much.

And don't forget that EID also gets \$9.5 million of your property tax revenues (\$27 monthly per water/sewer customer) to subsidize EID's outsized employee benefits, bloated administration and 50% excess capacity.

Meanwhile General Manager Abercrombie and the EID Board slap themselves on the back claiming millions and millions of dollars of savings.

Their claims just don't add up.
